

Sustainability Overview:

BLÜCHER® HygienicPro®

Stainless Steel Drains & Channels for Better Food Safety

Sustainability Categories

Safety & Regulation

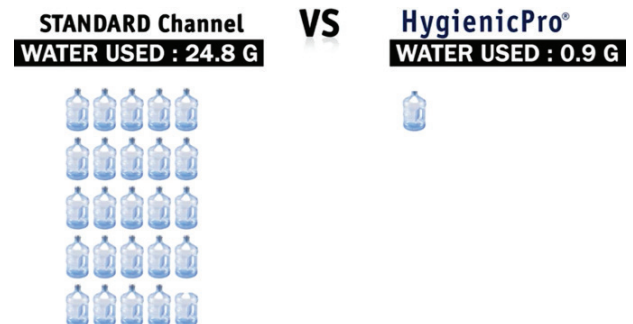

Water Conservation

Key Highlights

- **Water Conservation:** The HygienicPro is designed to use 96.5% less water than traditional channels.
- **Sustainable Materials:** Stainless steel is virtually maintenance-free, 100% recyclable, nontoxic, corrosion-resistant, non-combustible, and its smooth surface guarantees maximum flow capacity.
- **Durable Product:** Designed for long-life and for maintenance-free service.
- **Safety Benefits:** The HygienicPro properly drains both solids and liquids, avoiding hygiene and food safety issues such as the development of bacteria like Listeria.
- **Green Building Benefits:** HygienicPro is eligible to help earn building LEED points in the Sourcing of Raw Materials and Low Emitting Materials credit categories.

Clear Drains. Less Water.

Thanks to the HygienicPro's channel design, less water is needed to clear debris out from the drain.
